

P-3 Orion 04/12/17

Aircraft:

P-3 Orion ([See full schedule](#))

Flight Number:

Science Flight #21-Northwest Coastal C

Payload Configuration:

OIB Arctic

Nav Data Collected:

No

Total Flight Time:

7.2 hours

Submitted by:

Cate Easmunt on 04/14/17

Flight Segments:

From:	BGTL	To:	BGTL
Start:	04/12/17 11:45 Z	Finish:	04/12/17 18:55 Z
Flight Time:	7.2 hours		
Log Number:	17P006	PI:	Nathan Kurtz
Funding Source:	Bruce Tagg - NASA - SMD - ESD Airborne Science Program		
Purpose of Flight:	Science		

Flight Hour Summary:

	17P006
Flight Hours Approved in SOFRS	333.6
Total Used	299.1
Total Remaining	34.5

Mission:

OIB

Mission Summary:

Mission: Northwest Coastal C (high priority, last flown 2014)

This mission was created from the 2010-2012 ?Northwest Coastal? suite of missions by sampling individual coast-parallel lines from those flights to form a grid spaced at 30-35 km from the coast to near the 2000m contour line. This is one of three missions designed in this way, which together form a 10 km grid in the area. The others are Northwest Coastal A and B. We also add two additional bedrock-mapping lines in the Tracy/Heilprin catchment.

Clear weather along the northwest coast, but less so farther north of Thule, made for an easy decision today. As expected, we encountered some cross-winds and turbulence along the first/westernmost/lowermost track, which required us to slow down and ease off the autopilot. Because of time constraints and a delayed start, we had to cut short the Tracy and Heilprin transects at the end of this mission, but mopped up a flowline along Harald Moltke Bræ that had previously been cut from the Alexander-Peterman 01 mission. However, we still ended up overflying Helprin at the end of the mission. No other challenges were encountered as we surveyed the fluxgates of many outlet glaciers along the northwest coast. Our PolarTREC teacher for this deployment, Adeena Teres, joined us for her first flight with OIB. All instruments performed well, and we estimate 100% altimetry coverage.
